Displacement answers the question, "Has the object moved?" Note the \equiv symbol. This symbol is a sort of "super equals" symbol, indicating that not only does $\Delta x \equiv \Delta x$, but more importantly displacement is operationally defined by $\Delta x \equiv \Delta x$. We say that $\Delta x \equiv \Delta x$ operationally defines displacement, because $\Delta x \equiv \Delta x$ gives a step by step procedure for ...

Physics Study Guide/Linear motion - Wikibooks, open books ...

Check your answers What is the relation between constant speed (v), displacement (d) and time (t)?

$v = d/t = 10 \times 10^3 \text{ m} / (15 \times 60 \text{ s}) = 11 \text{ m/s}$

The car in (1) is then driven 8 km north to town C and from there, 13 km back to town A.

(a) What is the overall displacement? Check your answers The displacement is defined as: final position - initial position So in this case the displacement is zero.

Answers Study Guide Displacement And Force
What is your displacement from New York City after three days? $s = 15$ miles west of New York City. You first went west 10 miles, so at the end of the first day, your displacement was 10 miles west. Next, you went west 14 miles, putting your displacement at 10 miles + 14 miles = 24 miles west of New York City.
