"Taking the mystery out of economics is a public service. Brilliant Economics achieves this with aplomb". Chris Giles, Economics Editor, Financial Times "Economics is vitally important in everyday life because we are all living with the consequences of the global crisis, but it's often confusing. Brilliant Economics is a crystal clear and illuminating guide through the maze of financial jargon and difficult concepts. It explains in straightforward terms what the economic theories mean and also how they affect the things everybody cares about - jobs, prices, interest rates". Diane Coyle, OBE, Enlightenment Economics and Smith School, Oxford University "Phil writes in a clear manner, simplifying ideas that can be complex. He has a fine ability to mix relevant and topical observations with more detailed discussions, bringing a topic to life and making it easily understood". Ian Bright, Senior Economist, ING and leader of eZonomics, ING's international consumer economics project Do you know David Ricardo from Adam Smith? What is the importance of Keynes and Friedman? How can a central government's economic policy impact on your job, your wealth and your happiness? And are some things really too big to fail? In Brilliant Economics, award winning journalist Phil Thornton introduces you to the fundamentals of economics and monetary policy. It'll help you become more knowledgeable about economics and will give you an awareness that will help you in good times and bad. Economics is the study of the production, distribution, and consumption of goods and services. But in real terms it affects all of us on a daily basis: what we can buy, where we can live, how our careers develop and where we can go on holiday. Brilliant Economics is your easy-to-understand introduction to the world of economic policy, theory and how these things practically affect you. Beginning with the basics of economic thinking, the book looks at key theorists and key economic ideas. It explains how economies grow and why recessions happen. You'll understand about unemployment and recognise the importance of inflation. Learn why buying a house may make sense and find out what the real role of governments are, and why they ask you to pay tax.

"To change the way students see the world: this is my goal in teaching economics and in writing this book. Three facts about students are my guiding principles. First, they want to learn, but they are over-whelmed by the volume of claims on their time and energy. So, they must see the relevance to their lives and future careers of what they are being asked to learn. Second, students want to get it, and get it quickly. So, they must be presented with clear and succinct explanations. And third, students want to make sense of today's world and be better prepared for life after school. So, they must be shown how to apply the timeless principles of economics and its models to illuminate and provide a guide to understanding today's events and issues, and the future challenges they are likely to encounter. The organization of this text arises directly from these guiding principles"--

This edition of ICD-O, the standard tool for coding diagnoses of neoplasms in tumour and cancer registrars and in pathology laboratories, has been developed by a working party convened by the International Agency for Research on Cancer / WHO. ICD-O is a dual classification with coding systems for both topography and morphology. The book has five main sections. The first provides general instructions for using the coding systems and gives rules for their implementation in tumour registries and pathology laboratories. Section two includes the numerical list of topography codes, which remain unchanged from the previous edition. The numerical list of morphology codes is presented in the next section, which introduces several new terms and includes considerable revisions of the non-Hodgkin lymphoma and leukaemia sections, based on the WHO Classification of Hematopoietic and Lymphoid Diseases. The five-digit morphology codes allow identification of a tumour or cell type by histology, behaviour, and grade. Revisions in the morphology section were made in consultation with a large number of experts and were finalised after field-testing in cancer registries around the world. The alphabetical index gives codes for both topography and morphology and includes selected tumour-like lesions and conditions. A guide to differences in morphology codes between the second and third editions is provided in the final section, which includes lists of all new code numbers, new terms and synonyms added to existing code definitions, terms that changed morphology code, terms for conditions now considered malignant, deleted terms, and terms that changed behaviour code.

He was called "Mr. Pentecost." Davis du Plessis was a man raised up by God for a specific mission. That mission was to boldly give testimony of the power of the baptism in the Holy Spirit to the leaders of the World Council of Churches at the height of the Pentecostal Movement. "The Spirit Bade Me Go" contains the transcribed talks and messages given by brother du Plessis as he ministered in conferences and services around the world. As you turn the pages of this priritual classic, you will feel the breath of God's Spirit bringing renewal to your heart.
