Cessna Manuals

In 1970, Cessna introduced the Model A150K Acrobat, a 150 with structural changes to allow aerobatics. It is rated at +6G to -3G, which permits most standard acrobatic maneuvers such as snap rolls, barrel and aileron rolls, Cuban eights, loops, etc. Empty weight of the Aerobat is slightly higher than the standard 150, and speed is reduced by two mph.

CESSNA 150 "COMMUTER"/"AEROBAT" - Plane & Pilot Magazine

Training with Bill Kershner in the Cessna Aerobat May 5, 2000 I first heard that Cessna was planning to market an aerobatic version of the 150 when I was contacted to work with people there in writing the Cessna 150 Aerobat Training Manual, which was to be used by the flight schools that were setting up an aerobatic program with the airplane.

For Flight Training Reference Only - CP Aviation

The A152 Aerobat is a 152 modified for aerobatic training with increased structural strength up to +6g and -3g forces. Cessna built 23,902 150s and 7,593 152s for a series total of 31,533. Only 1,483 of these were Aerobats. Cessna built the vast majority of the series in Wichita, but Reims Aviation in France built nearly 2,500 under Cessna license.

Cessna 150 aircraft manuals - PilotMall.com

One might wonder why a common little plane sits in such a hallowed hangar. After all, the Cessna 152 Aerobat, a mildly aerobatic version of the long-running Cessna 150/152 model, one of thousands built, was pretty commonplace, its sporty checkerboard paint scheme and skylight windows notwithstanding.
