Chapter 4: The Noun Phrase Pages 1 - 9 - Text Version ... This chapter presents the structure of the noun phrase. As in the contemporary daughter languages, there is both a preposed and an enclitic definite article in Old Norse. The internal word order of NPs is rather free: possessors and adjectives may precede or follow the noun, and the noun may take complements in the form of prepositional phrases or noun phrases.

Noun Phrase - Oxford Scholarship (ii) phrase-level categories, e.g. NP = Noun Phrase; VP = Verb Phrase; AP = Adjectival Phrase; PP = Prepositional Phrase; ADVP = Adverbial Phrase, etc. In this chapter and the next, however, we are going to argue that our existing Theory of Categories should be extended to include a third type of category intermediate between word-level and phrase-level categories.

The English Noun Phrase: an empirical study. funded by . Final Project Report (summary) Research Issues I. Structural. Headedness in NPs. In particular problematic cases like: sort/kind/type-of constructions: a sort of artist, these sort of questions; close apposition: the director Orson Welles, the number four

The English Noun Phrase Project Report

The head of a phrase is important, but often this is intuitively understood. Phrases are very often coordinated by means of and or or and a structure for this is given in section 3. In section 4, more precise rules are given on how to identify phrases. Why nobody diagrams sentences anymore!! 1. The Phrase. 1.1 The Noun Phrase (NP)

Grammar of English -- Chapter 3

In Sections 1 to 4 we describe patterns in which the verb is followed by a noun group and either a prepositional phrase introduced by a wide variety of prepositions or an adverb group. In Sections 5 to 27 we describe patterns in which the verb is followed by a noun group and a prepositional phrase introduced by a specific preposition, such as about, to, or with. These sections are ordered alphabetically, by preposition.

Chapter 4: Complex Patterns with Prepositions and Adverbs

L. Identify the phrases in the following sentences and classify them as Adjective, Adverb or Noun phrases. 1. The girl in blue saree is my sister. Adjective phrase: in blue saree (It modifies the noun – girl) 2. Kohli hopes to win the trophy. Noun phrase: to win the trophy (it serves as the object of the

verb hopes) 3. The train halts at every junction.

Chapter 4 Modifiers and Complements Adjectives and Adjective Phrases Structure An adjective phrase consists of an adjective and all of its modifiers and complements. The smallest possible adjective phrase therefore consists of just an adjective. Notice that in the sentence like Olive wants a really big car, there is an adjective phrase really

Chapter 4 Modifiers and Complements Adjectives and ... Chapter 4 The Determiner Phrase The time has come to start applying what we have introduced in the previous three chapters to the analysis of English structures. We will start with the Determiner Phrase as it is one which appears in many of the other phrases we shall investigate.

Chapter 4 The Determiner Phrase - u-szeged.hu
"The compelling data and analyses in these chapters advance our understanding of the multifaceted nature of grammatical constituents such as the noun phrase.

In A Grammar of Lopit, Jonathan Moodie and Rosey Billington provide a detailed description of the phonology, morphology, and syntax of Lopit, an Eastern Nilotic language traditionally spoken in the Lopit Mountains in South Sudan.

The "NP" is one of the least controversial grammatical units that linguists work with. The NP is often assumed to be universal, and appears to be robust cross-linguistically (compared to "VP" or even "clause") in that it can be

manipulated in argument positions in constructed examples. Furthermore, for any given language, its internal structure (order and type of modifiers) tends to be relatively fixed. Surprisingly, however, the empirical basis for ⊡NP⊡ has never been established. The chapters in this volume examine the NP in everyday interactions from diverse languages, including little-studied languages as well as better-researched ones, in a variety of interactional settings. Together, these chapters show that cross-linguistically, the category NP is not as robust as has been assumed: in the context of temporally unfolding human interaction, its structural status is constantly negotiated in terms of participants⊡ evolving social agendas.

This book reports on the results of a project whose aim was to give a detailed description of a number of syntactic properties of postmodifying clauses in the English NP, and study the way in which some of these properties are related to each other in a variety of text tyoes. The study is based on an examination of the Nijmegen Corpus, which consists of slightly over 130,000 words of running text. The structure of the NP is described basically in terms of four constituents: DeterminerPremodifierHeadPostmodifier No fewer than 2,430 occurrences of postmodifying clauses in NPs were analysed. A numerical coding scheme was designed, in which 26 different variable features were encoded, describing the properties the postmodifying clauses. These were processed and statistically analysed. The book discusses the methodology adopted and the results of the statistical analyses. Among the properties described are the function of NPs with postmodifying clauses, the structure of these NPs, the realisation and reference of the heads of these NPs, the specific types of postmodifying clause, the actual link words used, the clause patterns occurring in the postmodifying clauses, and the verb phrases in the postmodifying clauses.

The Noun Phrase in Classical Latin Prose offers an account of the semantic and syntactic properties of nouns and modifiers and their ordering within the noun phrase.

This book presents a detailed analysis of structural as well as pragmatic aspects underlying the phenomenon of noun ellipsis in English. Here Günther examines the structure of elliptical noun phrases to account for the conditions on noun ellipsis and those on one-insertion, with special emphasis on the (oft-neglected) parallels between the two. She also examines the use of noun ellipsis with adjectives in order to shed light on this under-researched phenomenon, drawing on data from the British National Corpus.

This is the first description of Goemai, a West Chadic language of Nigeria. Goemai is spoken in a language contact area, and this contact has shaped Goemai grammar to the extent that it can be considered a fairly untypical Chadic language. The grammar presents the structure of the present-day language, relates it to its diachronic sources, and adds a semantic perspective to the description.

Building on a substantial earlier literature, the chapters in this volume further advance knowledge and understanding of properties of the noun phrase in English. The empirical material for the papers includes both historical and present-day data, with the two often shedding light on each other in a process of mutual illumination. The topics addressed are: the structure of nounless NPs like the poor and the obvious; the article/zero alternation in expressions like go to (the) church; developments in the early history of adjective stacking; the semantics of N + clause units in present-day English; the history of N + BE + clause constructions; and the decline of

two anaphoric NPs in Early Modern English. The volume will appeal to scholars working in this area and will also help those interested in the general field of English grammar to keep abreast of recent methods and results in NP-related work.

The notions of Karaka and Vacya comprising a theory of co-reference in Syntactico Semantics is an established theory in Indian Grammar.In relation to the descriptive analysis of Bengali noun-phrase the complexity of Karaka-Vacya configuration has been discussed in this book. Also the notion of role and the notion of ergative have been dealt with.

This book is a theoretically oriented, comparative study of noun phrases and their semantic and morpho-syntactic properties. This is the first study that provides a comprehensive analysis of the nominal structure in Uzbek, and compares it with corresponding structures in other article and article-less languages. Uzbek nominals represent a fertile ground to test the universality of the DP hypothesis and to make an insightful contribution to an ongoing debate about the functional architecture of the nominal domain in languages with and without articles. The study shows that the ordering of various nominal suffixes in Uzbek reflects a rich functional structure, involving not only DP but also KP. The work also discusses elements such as determiners, demonstratives, quantifiers and adjectives, and positioning of these elements within the nominal domain. This study is especially useful for researchers interested in theoretical linguistics, comparative syntax and typology.
