A powerful nineteenth-century French classic depicting the moral degeneration of a weak-willed woman

Meet the man who will go to any length in search of a good meal. Popular food blogger and Kalyan Karmakar has spent a lifetime being obsessed with food. In *The Travelling Belly*, he takes you on a delectable journey through the crowded lanes of India's food havens, guiding you towards the good, and veering you away from the bad and the ugly of India's multifarious urban foodscapes. Join him as he traces the many intricacies of the true-blue Bengali mahabhoj in Kolkata; dives deep into the kebab-laden alleys of Old Delhi; quests for the original Tunday in Lucknow; tracks down the crispiest kulchas in Amritsar and digs out the perfect Bohri meal in Mumbai. From sampling the biryani in Hyderabad to falling in love with the dosa in Chennai; from uncovering the best breakfast in Bangalore to getting to the heart of the home-cooked Goan meal, Kalyan's food journeys will take you on a sensory experience that is as delicious as it is revelatory. Flavoured with the characteristic candour that his blog, *Finely Chopped*, is famous for, *The Travelling Belly* comes with recommendations from master chefs and food writers across India, providing a fascinating taste of the smorgasbord that is India's cuisine and reaffirming how in India, more than anywhere else in the world, we are what we eat.

Completely Me is a story about a little girl who never noticed there was something different about herself until others pointed it out. When she decides to stand up for herself, she teaches the townspeople an important lesson about acceptance.

The Internet and the World Wide Web (WWW) play an increasingly important role in our today's activities. More and more we use the Web to buy goods and to inform ourselves about cultural, political, economical, medical, and scientific developments. For example, accessing flight schedules, medical data, or retrieving stock information become common practice in today's world. Many people assume that there is no one who "watches" them when accessing this data. However, sensitive users who access electronic shops (e-shops) might have observed that this assumption often is not true. In many cases, E-shop track the users' access behavior when browsing the Web pages of the e-shop thus deriving "access patterns" for individual shoppers. Therefore, this knowledge on access behavior and access patterns allows the system to tailor access to Web pages for that user to his/herspecific needs in the future. This tracking of users might be considered harmless and "acceptable" in many cases. However, in cases when this information is used to harm a person - for example about the person's health problems - or to violate his/her privacy (for example finding out about his/her financial situation), he/she would like to be sure that such tracking is impossible to protect the user's rights
