In his book, Vyacheslav Nikonov shows the origins of the modern world and traces the chronologies and histories of peoples and countries. Nikonov discusses the main centers of influence and forces that shape the world in which we live. The world demonstrates a variety of development models shaped by the national, regional, historical, religious and other aspects of each country. The center of gravity of world development is shifting from West to East, from North to South, from developed economies to developing ones. Thirty years ago, Western countries accounted for 80% of the world economy; now it is less than half. Asia, already home to most of humanity, will become a global leader in the coming decades. What does this mean? What will the world be like and what place will Russia take in it? Will American hegemony continue? Will China become a superpower? Will Europe become a museum for tourists from other continents? History has resumed its course and the world is rushing towards an unstoppable diversity. Published with the support of the Institute for Literary Translation, Russia.

The lyrical and lifelike art works of Mayan culture have given archaeologists and historians the key to ancient Mayan history. This eBook describes social, religious, and artistic life, from their beginning until their destruction by the Spanish conquerors in the sixteenth century. In more recent years, teams of scientists have methodically explored the jungles and plains and have unearthed a wealth of information. But, unlike Egypt, Babylon, or Greece, where archaeologists have searched widely, the land of the Maya is still largely untouched in comparison. There are over five thousand ruins in Mexico alone, most of which have not been disturbed by the archaeologists' spades. There are perhaps hundreds more ruins hidden in the forests, their fallen stones covering a thousand secrets. The news of this little bit of gold was later to spur other greedy Spaniards on to further exploration and to the eventual conquest of three great American civilizations, the Incas, the Aztecs, and the Maya. The Mayan people were short. The average height of a Mayan man was five feet one inch; that of a woman, four feet eight inches. Their hair was straight and black, while the colour of their skin was coppery or brown. Mayan men did not shave. What little hair they had on their faces, they pulled out. The men wore their hair in braids, wound around the top of their heads, with a queue hanging down the back. The women wore their hair long, and arranged it in various ways.

When it comes to religion, people often have more questions than answers. In *A Beginner's Guide to God*, author Eric Neal hopes to eliminate some confusion surrounding religion and provide a clear and universal pathway to the creator. In this guide, Neal addresses some of life's biggest questions: Does God exist? What happens when we die? Is this our only life? Who created the universe? How was the universe created? Why was it created? What is the spiritual realm? Why do people believe in a higher power? In addition to addressing the large questions, *A Beginner's Guide to God* explores the origins,

history, and leadership of some of the world's major religions and provides a synopsis of their teachings. A Beginner's Guide to God offers a general guide to spark interest and clarify aspects of mankind's most important questions. Its goal is to help us make sense of religion, its progression, and the existence of a higher power. This is Eric Neal's first book, produced after many years of contemplation on the plight of religion in the modern age.

World acclaimed scientist Vaclav Smil reveals everything there is to know about nature's most sought-after resource Oil is the lifeblood of the modern world. Without it, there would be no planes, no plastic, no exotic produce, and a global political landscape few would recognise. Humanity's dependence upon oil looks set to continue for decades to come, but what is it? Fully updated and packed with fascinating facts to fuel dinner party debate, Professor Vaclav Smil's Oil: A Beginner's Guide explains all matters related to the "black stuff", from its discovery in the earth right through to the controversy that surrounds it today.

Mars is considered as one of our most important future destinations . Why? Because we need to colonize Mars in order to extend the human civilization into the outer solar systems and into deep space. Currently, we are considering colonizing the red planet. Many space agencies and private companies are working to send humans to Mars in following decades with the dream of colonizing the planet.

Vaclav Smil describes the concept of energy, while exploring a range of topics including everything from the inner workings of the human body to the race for more efficient and environmentally friendly fossil fuels.
