Understand the world today through maps; find places in the world, explore countries, get to grips with graphs and discover world themes.

Collins UK in Maps is a multi-topic atlas of the UK, which introduces the most relevant topics to reflect the Geography Key Stage 2-3 requirements of the National Curriculum. Formerly published as Collins Keystart UK Atlas, this collection of maps can be used to investigate different themes and topics. It tells a story in maps, diagrams, charts, words and photographs each of which presents information to compare and examine. We live on a remarkable planet and this atlas helps us to make sense of the UK today and understand how things came to be as well as how they might change in years to come. Suggested activities on each spread encourage users to explore further.

Published with ISME, ITTO and project partners FAO, UNESCO-MAB, UNEP-WCMC and UNU-INWEH This atlas provides the first truly global assessment of the state of the world's mangroves. Written by a leading expert on mangroves with support from the top international researchers and conservation organizations, this full colour atlas contains 60 full-page maps, hundreds of photographs and illustrations and a comprehensive country-by-country assessment of mangroves. Mangroves are considered both ecologically and from a human perspective. Initial chapters provide a global view, with information on distribution, biogeography, productivity and wider ecology, as well as on human uses, economic values, threats, and approaches for mangrove management. These themes are revisited throughout the regional chapters, where the maps provide a spatial context or starting point for further exploration. The book also presents a wealth of statistics on biodiversity, habitat area, loss and economic value which provide a unique record of mangroves against which future threats and changes can be evaluated. Case-studies, written by regional experts provide insights into regional mangrove issues, including primary and potential productivity, biodiversity, and information on present and traditional uses and values and sustainable management.

This book of activities is designed to be used with Collins World in Maps, a theme based atlas of the World. The atlas matches the revised geography requirements for the National Curriculum at Key Stage 2. The 'Activities' book contains over 70 photo-copyable worksheets which form the basis for lesson planning. These readymade activities are ideal extension material to the suggested activities contained within the atlas (World in Maps). The In Maps series includes Collins World in Maps Collins UK in Maps Collins UK in Maps Activities

Prepared specifically to support social studies and geography courses at upper primary and lower secondary levels throughout the Caribbean. The atlas is fully illustrated and includes the most up to date reference and thematic mapping of the countries within the Caribbean Community as well as the broader Caribbean region. Maps are fully supported with illustrations, photographs and data. World maps cover international issues which have a bearing on Caribbean development.

Presents an atlas featuring physical, population, and climate maps of the world and of the continents.
