Vs Analog
~~Analog vs Digital:
What's the
Difference? — Guru99~~

An Analog signal is any continuous signal for which the time varying feature (variable) of the signal is a representation of some other time varying quantity, i.e., analogous to another

Download Ebook Digital

time varying signal. It differs from a digital signal in terms of small fluctuations in the signal which are meaningful. A digital signal uses discrete (discontinuous) values. By contrast, non-digital (or analog) systems use a continuous range of values to represent information.
