This adventure in science and imagination, which the Medical Tribune said might herald "a Copernican revolution for the life sciences," leads the reader through unexplored jungles and uncharted aspects of mind to the heart of knowledge.In a first-person narrative of scientific discovery that opens new perspectives on biology, anthropology, and the limits of rationalism, The Cosmic Serpent reveals how startlingly different the world around us appears when we open our minds to it.

Over the years, startling evidence has been unearthed, challenging established notions of the origins of Earth and life on it, and suggesting the existence of a superior race of beings who once inhabited our world. The product of thirty years of intensive research, The 12th Planet is the first book in Zecharia Sitchin's prophetic Earth Chronicles series—a revolutionary body of work that offers indisputable documentary proof of humanity's extraterrestrial forefathers. Travelers from the stars, they arrived eons ago, and planted the genetic seed that would ultimately blossom into a remarkable species...called Man. The 12th Planet brings to life the Sumerian civilization, presenting millennia-old evidence of the existence of Nibiru, the home planet of the Anunnaki, and of the landings of the Anunnaki on Earth every 3,600 years, and reveals a complete history of the solar system as told by these early visitors from another planet. Zecharia Sitchin's Earth Chronicles series, with millions of copies sold worldwide, deal with the history and prehistory of Earth and humankind. Each book in the series is based upon information written on clay tablets by the ancient civilizations of the Near East. The series is offered here, for the first time, in highly readable, hardbound collector's editions with enhanced maps and diagrams.

Presents conclusive evidence that ancient Egypt was originally the remnant of an earlier, highly sophisticated civilization ! Supports earlier speculations based on myth and esoteric sources with scientific proof from the fields of genetics, engineering, and geology ! Provides further proof of the connection between the Mayans and ancient Egyptians ! Links the mystery of Cro-Magnon man to the rise and fall of this ancient civilization In the late nineteenth century, French explorer Augustus Le Plongeon, after years of research in Mexico's Yucatán Peninsula, concluded that the Mayan and Egyptian civilizations were related—as remnants of a once greater and highly sophisticated culture. The discoveries of modern researchers over the last two decades now support this once derided speculation with evidence revealing that the Sphinx is thousands of years older than Egyptologists have claimed, that the pyramids were not tombs but geomechanical power plants, and that the megaliths of the Nabta Playa reveal complex astronomical star maps that existed 4,000 years before conventional historians deemed such knowledge possible. Much of the past support for prehistoric civilization has relied on esoteric traditions and mythic narrative. Using hard scientific evidence from the fields of archaeology, genetics, engineering, and geology, as well as sacred and religious texts, Malkowski shows that these mythic narratives are based on actual events and that a highly sophisticated civilization did once exist prior to those of Egypt and Sumer. Tying its cataclysmic fall to the mysterious disappearance of Cro-Magnon culture, Before the Pharohs offers a compelling new view of humanity's past.

Since earliest times, humanity has pondered the incomprehensible mysteries of the universe, life...and the afterlife. In The Stairway to Heaven, the second book of Zecharia Sitchin's Earth Chronicles series, the author answers these fundamental questions: Was there somewhere on Earth where, after death, mortal man could join the immortal Gods? Where was this place? By whom was it established? And does it still exist today? After years of painstaking research—combining recent archaeological discoveries with ancient texts and artifacts—Sitchin has identified the legendary Land of the Gods, and provided astounding new revelations about the Great Pyramids, the Sphinx, and other mysterious monuments whose true meanings and purposes have been lost for eons. The Earth Chronicles deal with the history and prehistory of Earth and humankind. Each book in the series is based upon information written on clay tablets by the ancient civilizations of the Near East. For the first time, the entire Earth Chronicles series is now available in a hardcover collector's edition.

Does there lie in mankind's remote past a single origin for the beliefs and practices of magic found in nearly every culture in the world? Behind the distortions and grotesqueries of magical practices, could there be clues to processes worthy of our objective consideration? First published nearly 40 years ago, Oriental Magic is still the definitive work on the subject. Its publication was the culmination of five years of research into rare artifacts, obscure manuscripts, and travels into remote areas where strange magical practices endure. The "singing sands" of Egypt, the invisible rulership of Sufism, subcutaneous electricity, and the prehistoric sources of Babylonian occult practices are just a few of the intriguing subjects described. The author includes personal accounts of "training" under a ju-ju witch doctor, a demonstration of Hindu levitation, and translations of secret alchemical and magical formulae. Revealed is an astonishing similarity in magical beliefs, practices, and terminology of places as diverse as China, the Near East, Scandinavia, and Africa. Oriental Magic includes a myriad of illustrations, including unique photos of places and people associated with the mysterious world of magic. Only an author of Shah's experience, dedication, and knowledge of human nature could assemble such an array of arcane information into a dazzling picture of human beliefs and practices. This new release is sure to attract the attention of a new generation of interested readers.
