among European nightclub and beach rave patrons on the  
Balearic island of Ibiza, a popular tourist destination. Some

Unlocking the Groove is a groundbreaking, award-winning, music-driven analysis of electronic dance music (EDM). Author Mark Butler interweaves traditional and non-traditional musical analysis with consideration of the genre's history and social significance, deconstructing several typical examples of

electronic dance music and focusing on the interaction of beat and rhythmic structure in creating an overall musical design. Interviews with DJs, listeners, and producers flesh out the book, providing insight into the perceptions and performance world of EDM, and making a vivid case for the musical artistry of EDM disc jockeys. The CD included with the book illustrates the analysis with multiple musical examples, both in excerpts and full songs. Butler's work propels the study of popular music in exciting new directions, and will impact the range from popular music studies, music theory, ethnomusicology, and musicology.

Research on electronic dance music communities has been initiated by scholars in the fields of sociology, cultural studies,

public health research and others. Linguistic aspects, however, are rarely considered. Anita Jóri fills this gap of research and suggests a new perspective by looking at these communities as a discourse community. She gives an overview of the language use and discourse characteristics of this community while applying a mixed methodology of linguistic discourse analysis and cultural studies. The book is aimed at researchers and students in the fields of applied linguistics, popular music, media, communication and cultural studies.

Musical Rhythm in the Age of Digital Reproduction presents new insights into the study of musical rhythm through investigations of the micro-rhythmic design of groove-based music. The main purpose of the book is to investigate how

technological mediation - in the age of digital music production tools - has influenced the design of rhythm at the micro level. Through close readings of technology-driven popular music genres, such as contemporary R&B, hip-hop, trip-hop, electro-pop, electronica, house and techno, as well as played folk music styles, the book sheds light on how investigations of the musical-temporal relationships of groove-based musics might be fruitfully pursued, in particular with regard to their micro-rhythmic features. This book is based on contributions to the project Rhythm in the Age of Digital Reproduction (RADR), a five-year research project running from 2004 to 2009 that was funded by the Norwegian Research Council.

Today, no matter where you are in the world, you can turn on a radio and hear the echoes and influences of Chicago house music. Do You Remember House? tells a comprehensive story of the emergence, and contemporary memorialization of house in Chicago, tracing the development of Chicago house music culture from its beginnings in the late '70s to the

present. Based on expansive research in archives and his extensive conversations with the makers of house in Chicago's parks, clubs, museums, and dance studios, author Micah Salkind argues that the remediation and adaptation of house music by crossover communities in its first decade shaped the ways that Chicago producers, DJs, dancers, and promoters today re-remember and mobilize the genre as an archive of collectivity and congregation. The book's engagement with musical, kinesthetic, and visual aspects of house music culture builds from a tradition of queer of color critique. As such, *Do You Remember House?* considers house music's liberatory potential in terms of its genre-defiant repertoire in motion. Ultimately, the book argues that even as house music culture has been appropriated and exploited, the

music's porosity and flexibility have allowed it to remain what pioneering Chicago DJ Craig Cannon calls a "musical Stonewall" for queers and people of color in the Windy City and around the world.
