Engineering, procurement, and construction (EPC) contracts are the most common form of contract used to undertake construction works by the private sector on large-scale and complex infrastructure projects. Under an EPC contract a contractor is obliged to deliver a complete facility to a developer who need only turn a key to start operating the facility, hence EPC contracts are sometimes ...

Engineering Procurement and Construction Management Contract. Engineering Procurement and Construction Management contracts (EPCM contracts), like Engineering Procurement and Construction contracts (EPC contracts) are similar to design and build contracts, in that there is a single point of responsibility for the design and construction of the project, but generally, the client has less say over the design of the project than on a design and build project, and the contractor takes more risk .
