Written by leading academics, this book is an invaluable 'how to ...' guide to studying for a Geography degree. Written in a practical and conversational style, it offers important insights into how to succeed in the first year of your degree course, covering everything from how to succeed in assessments to how to decide where to live. Some of the information the book provides is academic and some of it is non-academic, as negotiating both is important in order to be successful in the first year of a Geography degree. Studying Geography at University is ideal for those in the early stages of applying to university. Each chapter offers hints and tips and gives practical real-world insights into becoming a successful geography student that will enrich applications, open days and visit days. It is also possible to dip into the chapter summaries, 'What Do Students Say?' and 'Top Tip' boxes only. Written by current students, from a range of institutions, these provide unique insights into the book's key points. Current students should also keep and refer to the book as an invaluable guide through the first few months of their degree. This guide is a must-read for anyone starting their studies in Human Geography, Physical Geography, Environmental Science or any other related subject at university.

In this fascinating biography, the first ever published about Alfred Maudslay (1850-1931), Ian Graham describes this extraordinary Englishman and his pioneering investigations of the ancient Maya ruins. Maudslay, the grandson of a famous English inventor and engineer, spent his formative adult years in the South Seas as a junior official in Great Britain's Colonial Office. Despite his exotic experiences, he did not find his true vocation until the age of thirty-one, when he arrived in Guatemala. Maudslay played a crucial role in exploring and documenting the monuments and architecture of the ancient Maya ruins at Palengue Copán, Chichén Itzá, and other sites previously unknown. His photographs and plaster casts have proven to be invaluable in the deciphering of Maya hieroglyphics. Personal resources allowed him to undertake fieldwork at a time when no institution provided such support. He made plaster casts of large stone monuments, accurate maps of sites, and painstaking recordings of inscriptions. His *Biologia Centrali-Americana*, a multivolume compendium of photographs, drawings, plans, and text published almost a century ago, remains an essential foundation for Maya studies. Perhaps Maudslay's greatest legacy is his magnificent collection of glass-negative photographs, many of which are reproduced in this book.

The thoroughly Revised & Updated 3rd Edition of the book "The Geography Compendium" has been prepared with enormous efforts for all IAS aspirants, State PCS and other competitive exams. The book is prepared on the concept "Latest Information - Authentic Data". The book is divided into 10 chapters followed by 2 levels of exercises with 1000+ Simple MCQs & statement based MCQs. The book not only covers 100% syllabus but is also covered with Mind Maps, Infographics, Charts, Tables and latest exam pattern MCQs. The emphasis of the book has been on conceptual understanding and better retention which are important from the point of view of the exam. The book captures most of the important questions with explanations of the past years of the IAS Prelim exam, CDS, NDA and other competitive exams distributed in the various chapters.
