Inside the World's Major East Asian Collections examines the rise of the "LAM," an acronym that stands for libraries, archives and museums. In doing so, this book profiles leading experts—librarians, archivists and museum curators—who specialise in East Asian collections from across the world. In examining the dynamically shifting role of the cultural institution in the context of managing information and collections, this book provides important themes offered by these cultural experts in understanding the necessary professional skills, knowledge and personalities that are required for working in such environments of varying size, scope and composition in LAMs. As galleries, LAMs manage preservation and access of history and culture, and their missions and goals as cultural institutions continue to converge. As collecting institutions, LAMs share the common mandate to preserve and make accessible primary resources valuable for researchers and professionals, as well as the public. LAMs are mostly publicly funded, publicly accountable institutions collecting cultural heritage materials. Another aim of this book is to enhance the visibility and recognise the efforts of the LAM professionals as cultural institution leaders, since much of their great contributions in the respective fields to preserving our cultural and documentary heritages have gone unnoticed outside their parent institutions. Examines the roles and goals of cultural institutions Brings collections to life through interviews with LAM experts Presents LAMs with a focus on East Asia Serves as a platform for LAM professionals to share and exchange experiences and insights

The Far East: A Concise History summarizes the history of three Far East or East Asian countries — China, Japan, and Korea. This book begins with an introduction to the three Asian countries' geographical features, climatic conditions, agricultural features, racial affinities, heritage, common linguistic features, and common political features. The rest of the chapters discuss the Far East in ancient and medieval times; Far Eastern civilization at its zenith; era of Western domination; Japan as the great power of the Far East; and growth of Chinese nationalism. The greater East Asia war; triumph of communism in China; and recovery of Japan are also deliberated. A list of maps illustrated throughout this text is likewise provided. This publication is intended primarily for use in schools, colleges, and universities as an introductory textbook on East Asian countries.
