A collection of essays from the visionary storyteller Gianni Rodari about fairy tales and folk tales and their great advantages in teaching creative storytelling. "Rodari grasped children's need to play with life's rules by using the grammar of their own imaginations. They must be encouraged to question, challenge, destroy, mock, eliminate, generate, and reproduce their own language and meanings through stories that will enable them to narrate their own lives." --Jack Zipes "I hope this small book," writes renowned children's author Gianni Rodari, "can be useful for all those people who believe it is necessary for the imagination to have a place in education; for all those who trust in the creativity of children; and for all those who know the liberating value of the word." Full of ideas, glosses on fairytales, stories, and wide-ranging activities, including the fantastic binomial, this book changed how creative arts were taught in Italian schools. Translated into English by acclaimed children's historian Jack Zipes and illustrated for the first time ever by Matthew Forsythe, this edition of The Grammar of Fantasy is one to live with and return to for its humor, intelligence, and truly deep understanding of children. A groundbreaking pedagogical work that is also a handbook for writers of all ages and kinds, The Grammar of Fantasy gives each of us a playful, practical path to finding our own voice through the power of storytelling. Gianni Rodari (1920-1980) grew up in Northern Italy and wrote hundreds of stories, poems, and songs for children. In 1960, he collaborated with the Education

Cooperation Movement to develop exercises to encourage children's creative and critical thinking abilities. Jack Zipes is a renowned children's historian and folklorist who has written, translated, and edited dozens of books on fairytales. He is a professor at the University of Minnesota. Matthew Forsythe lives in Montreal where he draws and paints for picture books, comics, and animations.

Emilio Sereni's classic work is now available in an English language edition. *History of the Italian Agricultural Landscape* is a synthesis of the agricultural history of Italy in its economic, social, and ecological context, from antiquity to the mid-twentieth century. From his perspective in the Italian tradition of cultural Marxism, Sereni guides the reader through the millennial changes that have affected the agriculture and ecology of the regions of Italy, as well as through the successes and failures of farmers and technicians in antiquity, the middle ages, the Renaissance, and the Industrial Revolution. In this sweeping historical survey, he describes attempts by successive generations to adapt Italy's natural environment for the purposes of agriculture and to respond to its changing ecological problems. *History of the Italian Agricultural Landscape* first appeared in 1961. At the time of its publication it was a pathbreaking work, parallel in its importance for Italy to Marc Bloc's masterwork of 1931, *The Original Characteristics of French Rural History*. Sereni invented the concept of the historical "agricultural landscape": an interdisciplinary characterization of rural life involving economic and social history, linguistics, archeology, art history, and ecological studies. The narrator tries to reconstruct the life and death of Krasnov, a Russian anticommunist, and his role in the history of the city of Trieste

More than a tenth of the land mass of the UK comprises 'urban fringe': the countryside around towns that has been called 'planning's last frontier'. One of the key challenges facing spatial planners is the land-use management of this area, regarded by many as fit only for locating sewage works, essential service functions and other un-neighbourly uses. However, to others it is a dynamic area where a range of urban and rural uses collide. *Planning on the Edge* fills an important gap in the literature, examining in detail the challenges that planning faces in this no-man's land. It presents both problems and solutions, and builds a vision for the urban fringe that is concerned with maximising its potential and with bridging the physical and cultural rift between town and country. Its findings are presented in three sections: the urban fringe and the principles underpinning its management sectoral challenges faced at the urban fringe (including commerce, energy, recreation, farming, and housing) managing the urban fringe more effectively in the future. Students, professionals and researchers alike will benefit from the book's structured approach, while the global and transferable nature of the principles and ideas underpinning the study will appeal to an international audience.

Among the violent personalities of the High Renaissance, Lucrezia Borgia is chiefly remembered as a raven-haired poisoner.

This book introduces the methodological and philosophical problems with which modern history of science is concerned, offering a comprehensive and critical review through description and evaluation of significant historiographical viewpoints. Incorporating discussion of key problems in general historical writing, with examples drawn from a range of disciplines, this non-elementary introduction bridges the gap between general history and history of science. Following a review of the early development of the history of science, the theory of history as applied to science history is introduced, examining the basic problems which this generates, including problems of periodisation, ideological functions, and the conflict between diachronical and anachronical historiography. Finally, the book considers the critical use, and analysis, of historical sources, and the possibility of the experiential reconstruction of history. Aimed primarily at students, the book's broad scope and integration of historical, philosophical and scientific matters will interest philosophers, sociologists and general historians, for whom there is no alternative introduction to the subject at this level.

From Rabelais's celebration of wine to Proust's madeleine and Virginia Woolf's boeuf en daube in *To the Lighthouse*, food has figured prominently in world literature. But perhaps nowhere has it played such a vital role as in the Italian novel. In a book flowing with descriptions of recipes, ingredients, fragrances, country gardens, kitchens, dinner etiquette, and even hunger, Gian-Paolo Biasin examines food images in the modern Italian novel so as to unravel their function and meaning. As a sign for cultural values and social and economic relationships, food becomes a key to appreciating the textual richness of works such as Lampedusa's *The Leopard*, Manzoni's *The Betrothed*, Primo Levi's *Survival in Auschwitz*, and Calvino's *Under the Jaguar Sun*. The importance of the culinary sign in fiction, argues Biasin, is that it embodies the oral relationship between food and language while creating a sense of materiality. Food contributes powerfully to the reality of a text by making a fictional setting seem credible and coherent: a Lombard peasant eats polenta in *The Betrothed*, whereas a Sicilian prince offers a monumental macaroni timbale at a dinner in *The Leopard*. Similarly, Biasin shows how food is used by writers to connote the psychological traits of a character, to construct a story by making the protagonists meet during a meal, and even to call attention to the fictionality of the story with a metanarrative description. Drawing from anthropology, psychoanalysis, sociology, science, and

philosophy, the author gives special attention to the metaphoric and symbolic meanings of food. Throughout he blends material culture with observations on thematics and narrativity to enlighten the reader who enjoys the pleasures of the text as much as those of the palate.
