When people hear the words ICOs, Ripple, Bitcoin, Cryptocurrency, Bitcoin or Mining they immediately shout: Cryptocurrencies have no value, why should I pay for them? ICOs are all scams Ripple is overvalued Initial Coin Offerings are not legal You hear this at family tables, Christmas gatherings, club meetings and so much more. This is due to the fact, that the Blockchain and cryptocurrency discussion has emerged from specialized forums and not the broader public sphere. Shockingly there is very much superficial knowledge floating around. Not only between individuals but also poorly researched news articles which badly compare ICOs to IPOs. Initial Coin

Offerings (ICO) are discussed everywhere. Yet much superficial knowledge is discussed. There is no good guide for what to look out for or how to participate in an ICO. Having researched the Blockchain Technology during my Ph.D. studies, I will introduce the ICO to you as well as present my opinion on its potential. In this book, we will start with looking at the high-level concept of cryptocurrencies with its two dominant players Bitcoin and Ether before diving into the Initial Coin Offerings (ICO) and a general market overview. Understanding the ICO Landscape is a cornerstone of your research into ICO investments. Having successfully laid the groundwork we will discuss the steps of an ICO investment, before reaching the core of your analysis - the evaluation of an ICO. Therefore, navigating the maze of substandard information and quality sources is your first task of your investment research. Certainly, it also begs the question - before even starting with your research - if this is a worthwhile endeavor or if the whole cryptocurrency and ICO scene will rapidly disappear. To answer this, let's first look at a few examples from the past. With the invention of the automobile, very little people initially thought that this stinking and loud vehicle would sometime replace the horse carriage. Now, look at today. What we can learn from this example is two-fold. First, innovations face a lot of criticism at first and are only adopted by a small enthusiastic group. So-called early adopters. Secondly, the first product (so-called Minimal Viable Product or MVP) usually isn't pretty. Yet, the car is widely used nowadays. This is due to the fact that the value of the innovation is long-term (fast transport from A to B) and the ecosystem (gas stations, paved roads) grew fast. Subsequently, we can see that the growth phase of innovations with so-called "network effects" is accompanied by a competition for standards. In our example the mixture of gas or in the example of the invention of electric light the war of currents between George Westinghouse's alternating current (known as AC) standard versus Thomas Alva Edison's direct current (DC) standard. We can see the same pattern when it comes to the underlying technology of cryptocurrencies and tokens (e.g. ICOs). Now the question is if the use of the Blockchain Technology can deliver long-term value and therefore can lead to a mass adoption. This question is inherently connected to the discussion of a society without paper money. Surely you will agree that the age of paper money is ending, as we mostly pay with credit cards and bank transfers. Now the question is if the costly institutions of this system can be replaced by this new decentralized network technology called Blockchain. These questions can only be answered by researching the underlying principles. In this book, I will guide you in understanding Blockchain and Initial Coin Offerings.

Help take your startup to the next step with the new and revised edition of the popular book on the VC deal process—from the co-founders of the Foundry Group How do venture capital deals come together? This is one of the most frequent questions asked by each generation of new entrepreneurs. Surprisingly, there is little reliable information on the subject. No one understands this better than Brad Feld and Jason Mendelson. The founders and driving force behind the Foundry Group—a venture capital firm focused on investing in early-stage information technology companies—Brad and Jason have been involved in hundreds of venture capital financings. Their investments range from small startups to large Series A venture financing rounds. The new edition of *Venture Deals* continues to show fledgling entrepreneurs the inner-workings of the VC process, from the venture capital term sheet and effective negotiating strategies to the initial seed and the later stages of development. Fully updated to reflect the intricacies of startups and entrepreneurship in today's dynamic economic environment, this new edition includes revisions and updates to coverage on negotiating, gender issues, ICO's, and economic terms. An engaging guide to excelling in today's venture capital arena Beginning in 2005, Brad Feld and Jason Mendelson, managing directors at Foundry Group, wrote a long series of blog posts describing all the parts of a typical venture capital Term Sheet: a document which outlines key financial and other terms of a proposed investment. Since this time, they've seen the series used as the basis for a number of college courses, and have been thanked by thousands of people who have used the information to gain a better understanding of the venture capital field. Drawn from the past work Feld and Mendelson have written about in their blog and augmented with newer material, *Venture Capital Financings* puts this discipline in perspective and lays out the strategies that allow entrepreneurs to excel in their start-up companies. Page by page, this book discusses all facets of the venture capital fundraising process. Along the way, Feld and Mendelson touch on everything from how valuations are set to what externalities venture capitalists face that factor into entrepreneurs' businesses. Includes a breakdown analysis of the mechanics of a Term Sheet and the tactics needed to negotiate Details the different stages of the venture capital process, from starting a venture and seeing it through to the later stages Explores the entire venture capital ecosystem including those who invest in venture capitalist Contain standard documents that are used in these transactions Written by two highly regarded experts in the world of venture capital The venture capital arena is a complex and competitive place, but with this book as your guide, you'll discover what it takes to make your way through it.

While creating new forms (Shari'ah-compliant standards) to operationalize Islamic values and ethics into the current conventional economic system and banking products is crucial to sustain the Islamic economy as it is today, we also need to develop new strategies to cope with the next economic evolution. The digital revolution in financial services is under way, and digital disruption has the potential to shrink the role and relevance of today ' s banks, while simultaneously creating better, faster, cheaper services that will be an essential part of everyday life. This forward-looking book discusses the crucial innovation, structural and institutional development for financial technologies (fintech) in Islamic finance. The authors explain concepts in fintech and blockchain technology and follow through with their applications, challenges and evolving nature. The book provides insights into technology which will enable and enhance actual prescribed Islamic behaviors in modern economic transactions. Case studies highlight how to cope with modern transactional behavior with the advent of global online/mobile markets, shorter attention spans, and impersonal trade exchange.
