Pediatric Symptom Checklist (PSC), PSC-Y, and PSC-17 ...

The Pediatric Symptom Checklist (PSC) is a 35-item parent-report questionnaire designed to identify children with difficulties in psychosocial functioning. Its primary purpose is to alert pediatricians at an early point about which children would benefit from further assessment.

Pediatric Symptom Checklist - Wikipedia

The Pediatric Symptom Checklist (PSC) is a brief questionnaire that helps identify and assess changes in emotional and behavioral problems in children. The PSC covers a broad range of emotional and behavioral problems and is meant to provide an assessment of psychosocial functioning. In addition to the original 35-item parent-reported questionnaire, there are translations into more than two dozen other languages, a youth self-report, a pictorial version and a shorter 17-item version for both ...

The PPSC is an emotional/behavioral screening instrument for children 18-65 months of age. The PPSC was created as one part of a comprehensive screening instrument designed for pediatric primary care and is modeled after the Pediatric Symptom Checklist. Items for the PPSC were developed by a team of experts who reviewed existing assessment instruments and relevant research literature.
