By searching the Web we were able to locate a 36-page 'User Manual' for the camera, which wasn't much better, although it was at least in English. A slightly more comprehensive online user guide is available at http://esupport.sony.com/docs/dvimag/DSCHX100V_guide/eng/contents/03/04/01/01.html. However, while they might suit novices, none of these 'guides' is of much use to serious photographers who want to dig deeper into key camera controls.

~~Sony Cyber shot DSC HX100V — Photo Review~~

Renew your passion for photography with Sony Cyber-shot DSC-HX100V / DSC-HX100, This digital camera will fuel your fervor for photography with its lineup of advanced yet user-friendly features. A Carl Zeiss Vario-Sonar T lens with 30x optical zoom brings distant subjects closer and high speed auto focus achieves dramatically clearer images while Exmor R CMOS sensor delivers remarkable low-light performance.

With 4,000 percent growth in just six months, 17 million users, and a record for more referral traffic than YouTube, Google+, and LinkedIn combined, Pinterest delivers an unbelievable opportunity for marketers . . . if they know how to effectively use it. Karen Leland acquaints business owners with the newest social media kid on the block. She covers: the ins and outs of signing up and getting started; building boards that get noticed, drive traffic, and convert fans into customers; creating a Pinterest community through power connections, contests, social media outreach, and smart pinning strategies; strategies for becoming a power Pinterest user and creating an enthusiastic following; best practices for pins that promote, including image optimization, consistent branding, social media integration, and high-value content; and Pinterest etiquette. Business owners learn to expand their business and brand's success – one pin at a time.

From Snuff: 'Vimes' prompt arrival got a nod of approval from Sybil, who gingerly handed him a new book to read to Young Sam. Vimes looked at the cover. The title was The World of Poo. When his wife was out of eyeshot he carefully leafed through it. Well, okay, you had to accept that the world had moved on and these days fairy stories were probably not going to be about twinkly little things with wings. As he turned page after page, it dawned on him that whoever had written this book, they certainly knew what

would make kids like Young Sam laugh until they were nearly sick. The bit about sailing down the river almost made him smile. But interspersed with the scatology was actually quite interesting stuff about septic tanks and dunnakin divers and gongfermors and how dog muck helped make the very best leather, and other things that you never thought you would need to know, but once heard somehow lodged in your mind.'

An introductory text that gives its reader a strong understanding of the dimensions of tourism, the industries of which it is comprised, the issues that affect its success, and the management of its impact on destination economies, environments and communities. Now in a full colour design, the new edition features a clear focus on the issues affecting 21st century tourism, providing students with extensive coverage on the effects of globalisation and global conflict; sustainability and climate change; developments in digital technology and the rise of the sharing economy. International case-studies and snapshots (mini-case studies) are used throughout and have been taken from around the globe, including the US, China, Russia, Gambia, Bhutan, Cuba, Singapore, New Zealand, Australia, Caribbean, Canada and the UK, and from companies including TUI, Airbnb and Marriot. The accompanying Online Resources include PowerPoint slides and an Instructor's Manual for lecturers and additional case studies, useful video links, and web links for students. Suitable for students new to tourism studies.

Presents images, with a focus on figural photography, produced between 2000 and 2010 by 17 South African photographers: David Goldblatt, Santu Mofokeng, Guy Tillim, Pieter Hugo, Zwelethu Mthethwa, Berni Searle, Jodi Bieber, Terry Kurgan, Zanele Muholi, Hasan and Husain Essop, Roelof van Wyk, Graeme Williams, Kudzanai Chiurai, Sabelo Mlangeni, Jo Ractliffe, Mikhael Subotzky, and Nontsikelelo Veleko.

The night sky may be the most awe-inspiring spectacle that any of us will ever see. It can, however, be difficult to capture in a photograph, as it requires specialized techniques that are rarely used when shooting images during the day. Renowned photographer Grant Collier sheds light on how to capture these otherworldly images by sharing secrets he has learned over the past 14 years. He explains how to take photos of the Milky Way, northern lights, meteors, eclipses, lightning, and much more. Grant begins by reviewing equipment and supplies that are helpful when photographing at night. He then discusses many software programs, web sites, and mobile apps that will help you plan your shots. Finally, he offers extensive advice on how to capture and process images at night. He goes beyond the basics and teaches how to blend multiple exposures and create huge stitched images to capture incredibly detailed photos that you never before thought possible! The 2nd Edition has been completely updated and includes 50 new images. The sections on cameras and lenses have been rewritten and now includes tables to make it easier see all of the recommended gear. All of the web links have been updated, and include many new websites you can use to plan your photos. All information on post-processing has been updated for use with Photoshop and Lightroom CC 2020. This includes some powerful new techniques for blending multiple exposures taken at night. There is also new information on Photoshop plug-ins and other software that is useful for night photography.

From flashlights and top-of-the-line studio electronic flashes to light stands and battery/inverter packs, this all-encompassing survey evaluates the vast array of lighting and equipment options available to professional photographers. Beginning with a basic history of the role of lighting equipment and the interplay between advances in capture and lighting technologies, the emphasis then shifts to advances made within the past five years that have enabled photographers to consider more low-powered and cost effective options than ever before. In addition to identifying the wide range of gear currently on the market—as well as those photographers may devise on their own—this reference examines the pros and cons of the various technologies and provides suggestions for their most practical use. Photographs of the equipment surveyed as well as real-life images created with the different pieces of equipment are interspersed throughout the text. Other helpful hints include tips for maximizing versatility, investment in each piece of equipment, and a "Top-Ten Must-Have List."

Mood mapping simply involves plotting how you feel against your energy levels, to determine your current mood. Dr Liz Miller then gives you the tools you need to lift your low mood, so improving your mental health and wellbeing. Dr Miller developed this technique as a result of her own diagnosis of bipolar disorder (manic depression), and of overcoming it, leading her to seek ways to improve the mental health of others. This innovative book illustrates: * The Five Keys to Moods: learn to identify the physical or emotional factors that affect your moods * The Miller Mood Map: learn to visually map your mood to increase self-awareness * Practical ways to implement change to alleviate low mood Mood mapping is an essential life skill; by giving an innovative perspective to your life, it enables you to be happier, calmer and to bring positivity to your own life and to those around you. 'A gloriously accessible read from a truly unique voice' Mary O'Hara, Guardian 'It's great to have such accessible and positive advice about our moods, which, after all, govern everything we do. I love the idea of MoodMapping' Dr Phil Hammond 'Can help you find calm and take the edge off your anxieties' Evening Standard 'MoodMapping is a fantastic tool for managing your mental health and taking control of your life' Jonathan Naess, Founder of Stand to Reason
