Management on the Road
If the ECU has a fuel or ignition
cut based on peak boost, set this
before doing any boost tuning.

Set the cut value a fraction above
the maximum boost value you
intend using. Set the cut value a
fraction above the maximum
boost value you intend using.

Programmable ECUs. All calibration and tuning parameters in a factory ECU are fixed by the manufacturer to suit the engine in its standard form and it is often impossible to adjust this for engine modifications. However, if the factory ECU is replaced by a programmable aftermarket system, adjustments can be made. An engine tuner can connect the ECU to a PC to tune the engine for optimum performance at each load and speed condition.
