Vidyamandir Classes - Best IIT JEE & NEET Coaching Institute

Hi!! Even though I cracked the test by only practicing the sample papers given by them, I would however recommend you to check the old class X syllabus (CBSE) as it includes some topics (specially in geometry) which are not part of the current CBS...

Raj can't believe his luck when he gets selected for a summer internship in Switzerland. He had always dreamed of travelling, and this was his chance to explore the world. During this internship, he crosses paths with Sofia, a German student studying in Switzerland. Little did he know that this chance encounter will alter the course of his life forever. Raj finds himself falling in love with Sofia. But as their time together in Switzerland nears an end, Raj finds himself torn between the desire to confess his feelings to Sofia and the fear of losing her. Will Raj be able to tell Sofia how he feels? Will they be able to sustain a love spanning across cultural and geographical boundaries? The Promises We Made recounts the journey of two people falling in love in the most unexpected of circumstances. But destiny had something else in store – a dark twist of events that leaves the reader lamenting the vagaries of fate.

Definite identification has been made of an isotope of the element with atomic number 98 through the irradiation of Cm²⁴² with about 35-Mev helium ions in the Berkeley Crocker Laboratory 60-inch cyclotron. The isotope which has been identified has an observed half-life of about 45 minutes and is thought to have the mass number 244. The observed mode of decay of ⁹⁸244 is through the emission of alpha-particles, with energy of about 7.1 Mev, which agrees with predictions. Other considerations involving the systematics of radioactivity in this region indicate that it should also be unstable toward decay by electron capture. The chemical separation and identification of the new element was accomplished through the use of ion exchange adsorption methods employing the resin Dowex-50. The element 98 isotope appears in the eka-dysprosium position on elution curves containing berkelium and curium as reference points--that is, it precedes berkelium and curium off the column in like manner that dysprosium precedes terbium and gadolinium. The

Online Library Vidyamandir Classes Admission Test Sample Paper

experiments so far have revealed only the tripositive oxidation state of eka-dysprosium character and suggest either that higher oxidation states are not stable in aqueous solutions or that the rates of oxidation are slow. The successful identification of so small an amount of an isotope of element 98 was possible only through having made accurate predictions of the chemical and radioactive properties.

1. Chapter-wise presentation for systematic and methodical study 2. Strictly based on the latest CBSE Curriculum and National Curriculum Framework. 3. All Questions from the Latest NCERT Textbook are included. 4. Previous Years' Question Papers from Kendriya Vidhyalaya Sangathan are included. 5.
